

**Policy & Compliance Management: The Next  
 Generation of Policy and Compliance Programs**

**Mason Karrer, CISSP, CISA**  
 GRC Solution Strategies, RSA

Core Competencies – C33

**Session Abstract**

Companies have always faced compliance requirements in one form or another. Individual efforts for SOX, or PCI, or NERC, are difficult enough. But most organizations face a mountain of additional regulatory scrutiny. The compounding effect of today's complex regulatory maze is overwhelming forcing even the strongest organizations into reactionary postures that are barely sustainable. Inadequate policy and compliance programs increase exposure risk not only to compliance fines and litigation but reputational and long term financial impacts. This presentation outlines how companies can regain their initiative to meet these challenges head on with a strategic approach to building solid governance and compliance programs.

**Target Audience**

Anyone interested in learning about and discussing the next generation in policy and compliance program management

**COBIT Objectives or Processes**
