

**Brett Wahlin**  
**VP & CSO, McAfee, Inc.**

---

Brett Wahlin is Chief Security Officer and Vice President of IT at McAfee. Wahlin is responsible for building world-class security capabilities that protect McAfee's assets, accelerate business growth and showcase McAfee products at work. All aspects of corporate security, including information protection, ID management, network security, threat analysis, emergency response, security policy, and audit/compliance programs fall under his purview.

As a security industry veteran, Wahlin brings to McAfee more than 20 years of experience leading large enterprise information security architecture, policy, operations, and development.

Previously, Wahlin served as Chief Information Security Officer (CISO), for Los Alamos National Laboratory where he was responsible for the creation of the Office of the CISO and the restructuring and strategic development of the Lab's Information Security and compliance programs.

Prior to Los Alamos, Wahlin served as vice president of security architecture and development for Wells Fargo Bank and led information security and computing infrastructure strategy and initiatives in support of the Wells Fargo computing enterprise. In addition, he has held various positions with Intel focused on application security, intellectual property protection, ID management, and product development.

Wahlin holds three degrees from Arizona State University, an MBA, a BA in Russian Language, and a BS in Criminal Justice. His professional credentials also include: CISSP, ISSAP, and ISSMP security professional certifications.
