Session Synopsis

GRC: It's not just SOX anymore. Organizations today are faced with ever increasing regulatory challenges and requirements; all while being held to higher levels of accountability. The shift to GRC being the "new normal" has many organizations re-thinking what is possible. How has GRC changed? What are the key challenges organizations are faced with today? Can technology and automation change the game? Prevention vs. detection...what is truly possible?

Speaker Biography

Chris Martin is a Governance, Risk and Compliance (GRC) Specialist currently working for Oracle Corporation here in the Bay Area. He has over 19 years of enterprise software experience encompassing advanced supply chain planning and execution systems, transportation and logistics management, and enterprise resource planning solutions. For the last five years, he has focused on helping global organizations address the core challenges they have been faced with around GRC processes and controls.

To register or cancel a registration, visit our website at <http://www.sfisaca.org> . Cancellation Policy is 72 hours prior to the event. Please do not be a 'no show'. Our Chapter is billed for reservations made with our facilities provider, and we will have to pass the charges on to you. Thank you for your cooperation.
